

MEASURING INSTRUCTIONS (excluding Coolaroo® Brand)

1. CHOOSE YOUR MOUNT

Inside:

- Mounted within the window frame
- A clean, uncluttered look
- For mounting depth requirements, refer to our "Specifications" tab online for each product you are ordering

Outside:

- Shade is mounted to the wall, ceiling or molding around the window
- Makes window area appear larger; helps hide unattractive windows or molding
- No minimum depth requirement
- Requires at least 2" of flat space above window molding for mounting brackets

2. MEASURE YOUR WINDOW

Inside:

- Step 1: Measure the inside width at the top of the window. Round to the nearest $\frac{1}{8}$ ". This is your ordering width. (Blindsgalore takes necessary deductions.)
- Step 2: Measure the height at 3 places: left side, middle and right side. Round up to the nearest $\frac{1}{8}$ ". Enter the longest measurement on your worksheet. This is your ordering height.
- Note: Roller shade fabrics may be at least $1\frac{3}{8}$ " narrower than your ordering width to allow for the mounting brackets. If this will create too much of a light gap in your window, please consider ordering an outside mount shade, and add sufficient width for overlap.

Outside:

- Step 1: Measure the width of the area you want to cover. Remember that the fabric will be narrower than the width you order, so we recommend adding 3 inches ($1\frac{1}{2}$ " on each side) to help eliminate light gaps. Enter this width on your worksheet; it is your ordering width and the width of the shade.
- Step 2: Measure the height of the area you want to cover including any extra overlap. Enter this height on your worksheet; it is your ordering height and the height of your shade.
